

X20i

Klipsch
REFERENCE

HEAR THE AIR

X20i is the most revealing in-ear headphone Klipsch has ever made. High frequencies are reproduced with unheard-of accuracy and bass is clear, full, and warm. Breaking the barriers of the capabilities in the class, X20i sets a new standard in headphone acoustics. Powered by a true two-way dual armature design, the high-horsepower KG-926T woofer is mated to a high resolution KG-125B super tweeter. This results in a palpable sound character and makes X20i the broadest bandwidth in-ear headphone available from Klipsch.

HIGH RESOLUTION SUPER TWEETER

Putting X20i into a class of its own, the KG-125B super tweeter creates a truly transparent sound. With high-frequency performance created to take advantage of superb lossless recordings, this headphone delivers hi-hats and cymbals with lifelike realism.

SURGICAL-GRADE STAINLESS STEEL

Injection-molded surgical-grade stainless steel is the primary material used in the X20i chassis. Complemented by a reverse hood scoop, X20i is one of the smallest and most durable two-way headphones on the market.

SUPER-SLIM EAR TIPS

With the introduction of X20i comes the most comfortable ear tip we have ever designed. Pre-installed on the product, we have redesigned our most popular ear tip into a super slim form factor. After extensive research, our surveys lead to the conclusion that ear canals are even narrower than we had ever expected. The super slim ear tip addresses that by using an even narrower and more tapered design, enabling people who have never found in-ear monitors to be comfortable to wear them without fatigue. However, all ears are unique, so included with the product are five additional sizes to choose from.

INTERCHANGEABLE CABLES

Complementing the groundbreaking design and acoustics of X20i is the ability to swap cables. Screw-type coaxial SSMCX connectors for both left and right sides allow for swapping cables or using custom balanced cables. Approximately 35% smaller than industry-standard MMCX connectors, X20i has all the advantages of interchangeable cables without any of the bulk.

ADVANCED THREE-BUTTON MIC AND REMOTE

Have seamless control of your iPhone, iPad, or iPod while listening to music, watching movies and answering phone calls.

ACCESSORIES

Available in stainless black finish, each comes with genuine leather carrying case, tie bar, five different sized ear tips and one-year warranty.

SPECIFICATIONS

STYLE	In-Ear
DRIVER DESIGN	KG-2625 AcuPass(R) Two-Way
DRIVER COMPONENTS	KG-125B Balanced Armature Super Tweeter, KG-926T Balanced Armature Woofer
MIC/REMOTE	mic+3-button remote
FREQUENCY RESPONSE	5Hz-40kHz
SENSITIVITY (1MW)	111dB
IMPEDANCE (1KHZ)	50 ohms
NOISE ISOLATION	-26dB
INPUT CONNECTIONS	3.5 mm
WEIGHT	22 grams
COLORS	Black
